Summary

Full-Stack Software Engineer experienced in building cloud-native applications across high-scale enterprise SaaS and startup ecosystems. Leverages Java, Spring Boot, Angular, AWS, and AI-driven tools to accelerate delivery, optimize system latency, and engineer high-throughput APIs impacting millions of users every day.

Experience

CGI

Bengaluru

Software Engineer

07/2024 - Present

- Architected core banking enhancements for the CGI Trade360 SaaS platform, refactoring legacy backend modules to improve API performance by 30% and ensure 99.9% uptime for global enterprise clients.
- Streamlined automated loan workflows while ensuring zero defects in SIT/UAT phases, delivering high-reliability production modules ahead of estimated timelines.
- Built and deployed an automated email notification service handling 500+ daily messages with 100% reliability, cutting manual intervention time by 3 hours daily.
- Engineered 10+ full-stack features using Java, Spring Boot, and Angular, increasing unit test coverage to 87% via JUnit and Mockito while boosting delivery speed by 25%.

Bengaluru

Walmart Global Tech

11/2023 - 03/2024

Software Engineer Intern

- Architected and implemented an optimized heap data structure in Java, boosting logistics data handling efficiency by 1.3x and cutting processing overhead by 18%.
- Designed scalable ER models and normalized database schemas to support new departmental modules, enabling 40% faster query performance.
- Partnered with senior engineers to conduct code reviews and enforce strict design patterns, accelerating deployment cycles across sub-teams.

Education

PES Institute of Technology

Bachelor of Engineer in Computer Science (8.64 cgpa)

12/2020 - 05/2024

Skills

- Languages :** Java, Python, JavaScript, TypeScript, HTML, CSS, Dart.
- FrameWorks :** Spring Boot, Hibernate, Angular, Flutter, JUnit, Mockito.
- Tools & DevOps :** Git, Docker, Jenkins, GitLab CI/CD, SonarQube, Kafka, Postman, Kibana.
- Cloud & Databases :** Amazon Web Services (AWS), SQL, MongoDB, PostgreSQL, Oracle.
- Core Skills :** Data Structures & Algorithms, System Design, Microservices, RESTful APIs, OOPS, Object-Oriented Design, MVC Architecture, Agile Development, CI/CD Automation, SDLC, Operating System, GitHub Copilot, Agentic AI, RAG Dev

Projects

AI-Powered DevOps Analytics & Recommendation System (Spring Boot, Python & RAG)

- Architected a RAG-based intelligence platform using Spring Boot microservices and vector embeddings to aggregate cross-tool telemetry from Jira, GitLab, and Jenkins.
- Integrated LLM-driven AI agents to analyze workflow patterns, generating proactive recommendations that eliminated iteration spillovers and boosted team engineering velocity.

Founder & Full Stack Developer | KIBYO (Grocery Delivery Application)

- Founded and developed KIBYO — a cross-platform grocery delivery app (Flutter + Spring Boot + Firebase) serving 500+ active users, improving order processing speed by 35%.
- Architected and deployed scalable backend APIs and a real-time order orchestration system, reducing delivery coordination latency by 22% and increasing user retention.

AWS-Enabled Real-Time Messaging Application (Spring Boot & REST API)

- Built and deployed an AWS-based real-time messaging system using Spring Boot and REST APIs, achieving 99.9% uptime and sub-150ms message latency.
- Engineered WebSocket and REST endpoints for real-time notification dispatching, maintaining sub-150ms message latency across concurrent user sessions.

Achievements

- Achieved AWS Certified Cloud Practitioner certification, validating proficiency in designing secure, scalable cloud solutions and optimizing system performance within AWS environments.
- Active contributor to open-source projects such as FreeCodeCamp, Metasfresh, MunGell improving code quality and collaboration.
- Delivered freelance backend systems for startups with 100% client satisfaction and zero downtime, showcasing adaptability and production-readiness.
- Utilized GitHub Copilot Agent Mode and LLM-based assistants to accelerate feature development, debugging, test generation, and code reviews across Java Spring Boot microservices and Angular UI implementations.
- IBM RAG and Agentic AI Professional Certification (In progress) .
